

Continental Worldwide
Trading Company

Company Profile

Continental Worldwide Trading Company is a pioneer in the field of scientific equipment and instruments since 1990. We provide a one-stop solution for Research, Pharmaceutical, Food & Beverages, Feed, Fertilizers, Testing Centers, Research institutes & academia.

CWTC has a professional setup with foreign trained engineers, & a focus on quality back-up service and support.

Our Mission

To provide quality products & services for science, research & industry.

Our Values

We aim to satisfy all stakeholders with integrity, passion, innovation, quality building sustainable partnerships.

Our Vision

We strive to be a market leader in the scientific field, providing complete lab solutions.

Titrande

High-end potentiometric titrator with FDA compliant software

Ti Touch

Touch Screen potentiometric titrator with FDA compliance

Titrino Plus

Basic & reliable potentiometric titrator for all applications.

OMNIS Titrator

Modern, high accuracy and safe titrator with FDA compliance.

Karl Fischer Titrande

High-end volumetric & coulometric KF titrators.

Karl Fischer Ti-Touch

Touch screen KF titrator & Coulometer with FDA compliance.

KF Titrino Plus

Volumetric titrator (upto 100%) contents.

Titrino Coulometer

For the determination of low amounts of water (0.001 to 1%) with optional oven.

Eco Titrator

Economical Titrator for all basic potentiometric applications.

930 Compact IC Flex

Compact ion chromatograph for routine analysis.

940 Professional IC Vario

High-end ion chromatograph for research applications.

ECO Ion Chromatograph

Entry level IC for academia and basic water testing.

NIRSystems Lab Analyzers

Quantitative & qualitative analysis for pharma / chemicals.

Raman Analyzer Mira P (pharma)

Handheld spectrometer; quick & easy id of unknown materials with FDA compliance

Raman Analyzer Mira DS

Handheld spectrometer for id of illicit / hazardous substances for defense and security.

pH/Ion meters

Advanced pH & ion meters for portable or lab use.

Compact Potentiostats

Compact & Modular potentiostat/ galvanostat for all electrochemical research applications

Portable Potentiostats

Portable potentiostats/ galvanostats for electrochemical research in lab & on site research

Liquid Handling

Automated liquid handling systems for precise manual titrations.

Rancimat

Measures the oxidation stability of natural oils & fats.

www.buchi.com

Laboratory Rotavapor

Complete, integrated systems for all distillation applications.

Kjeldahl Systems

Measurement of nitrogen (protein) acc. to Kjeldahl method.

Melting Point Determination

Melting & Boiling Point with high accuracy & easy calibration.

Parallel Evaporation

Evaporation or concentration of multiple samples in parallel.

NIR Spectrometer

Precise & analytical results in a matter of seconds.

Automatic Extraction

Automatic classical determination of fat (soxhlet), & residue analysis.

Preparative Chromatography

Basic, modular systems for flash chromatography.

Pure Preparative HPLC

Powerful systems for flash & high pressure chromatography.

Industrial Rotavapor

Efficient industrial distillation under vacuum up to 30L.

Lab Spray Dryer

Single step conversion of solutions into dry powder.

Encapsulator

Development of beads & capsule using prilling by vibration.

NIR Online

Process analyzer for real time results of key parameters.

Compact lab autoclaves

Front or top loading autoclaves with many accessories.

Front Loading Autoclaves

Upto 344L, with customization options.

Square Range Autoclaves

Easily customizable with a with options from 125L to 1400L.

Double Door Autoclaves

For sterile environments in pharmaceuticals/medica.

Water Baths

Water baths & shaking water baths for all lab applications.

Water Stills

Pure, bacteria & pyrogen free, low conductivity distilled water.

Deep Freezers

Ultra low freezers (-85°C) for long-term storage.

Shakers

Dependable & maintenance free shakers in different models.

Handheld Raman Analyzers

For material id & verification in QC, forensic analysis, counterfeit drug detection & security

Portable iRaman Analyzers

Portable spectrometer, high performance with low noise, ensure research-grade analysis.

Portable Spectrometer STRam

Delivering rapid material identification through a variety of layers & types of packaging.

NanoLibs Analyzer (Pharma)

Handheld Laser Induced Breakdown Spectroscopy (LIBS) analyzer for monoatomic salt id.

Heating Circulators & Baths

Water baths & circulators for heating up to 300°C.

Refrigerated Circulators

Heating & cooling, internal & external applications. (-50°~200°C)

Viscosity Baths

Highly precise temperature control of glass viscometers.

Immersion coolers/chillers

Cooling or external cooling for different applications.

Benchtop Refractometers

Benchtop Refractometers with high accuracy & CFR compliance

Automatic Polarimeters

High accuracy polarimeter with CFR compliance.

Portable Viscometer

Entry level, portable rotational viscometer.

CO2 Brix Monitor

Simultaneous measurement of CO2 & Brix with easy function.

Portable Refractometers

Fast & Easy | Brix, nD, Salinity, Salt %, Moisture, etc

Frying Oil Monitor

For Total Polar Materials & Acid Value measurement in oil.

Portable Meters

For acidity measurement, non destructive brix in fruit etc.

In-line Refractometers

Online measurements of Brix, Refractive Index etc.

Q-Line Fire Safety Cabinet

Storage of flammables, protection for 30 or 90 mins.

SL-Line Safety Cabinet

Safe storage of corrosive materials (acids & alkalis).

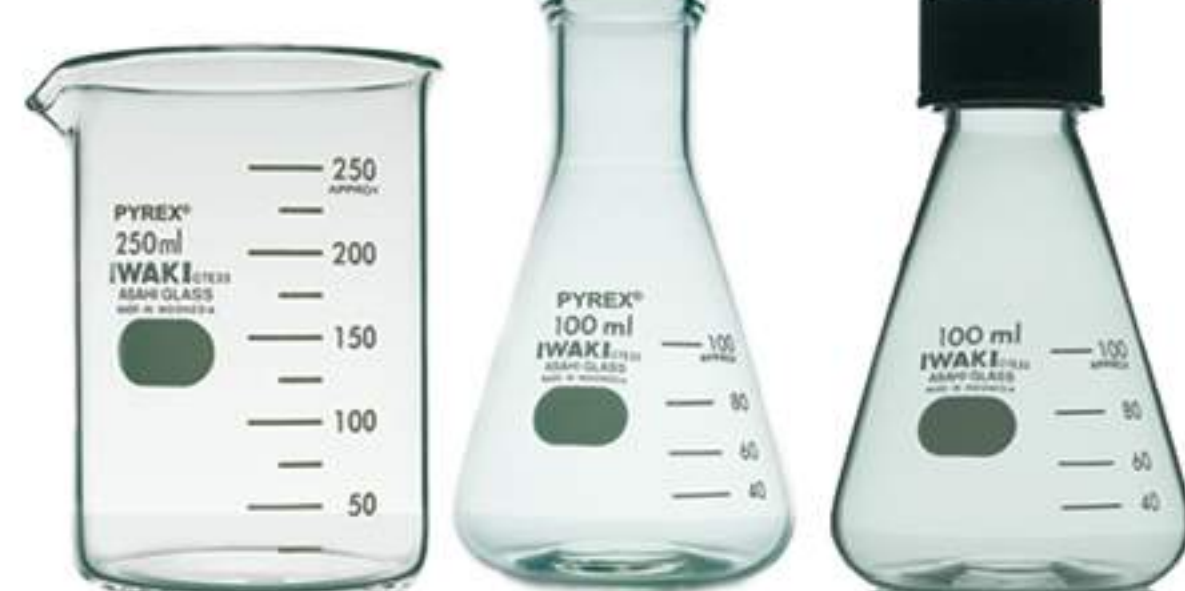

K-Line Safety Cabinet

Combined storage of flammables & corrosives.

C-Line Chemical Cabinet

Basic storage of chemicals, toxic materials & pollutants.

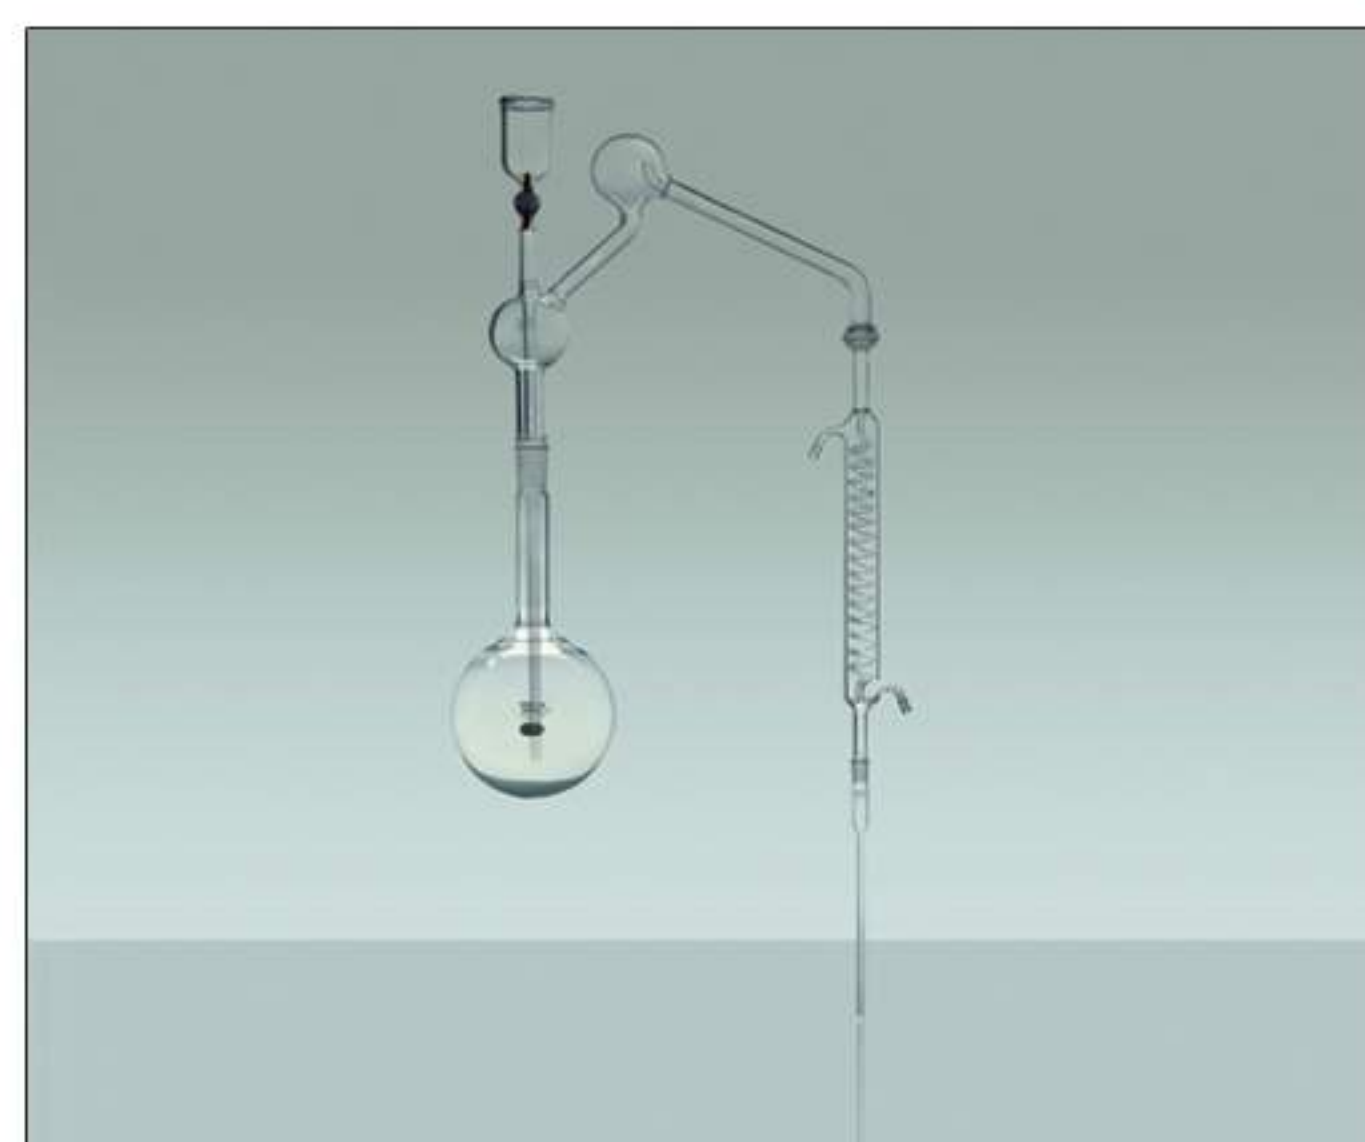

General Lab Glassware

Includes beakers, flasks, test tubes, vials, media bottles etc.

Volumetric Glassware (Class A)

Certified volumetric cylinders, volumetric flasks, & pipettes etc.

Glass Assemblies

Assemblies for different chemical reactions.

Reaction vessels & Jointware

Sockets & cones, condensers & columns for chromatography.

Lab Refrigerators (3~16°C)
Storage of pharma & sensitive substances (ATEX certified).

Laboratory Freezers (-40°C)
Storage with documentation & alarm systems.

Laboratory Fridge-Freezer
Combined storage with reliable documentation & alarm systems.

General Fridge/Freezers
Storage & branding appliances for commercial application.

Plastic Labware Products
Labware (beakers, flasks) & Class A/B volumetric labware.

Microliter Pipettes
Single & multi channel, high accuracy & self calibration.

Bottletop Dispensers
Accurate & repetitive dispensing of solvents & other media.

Digital Burettes
Rapid, convenient titration with highly accurate results.

Recycling Preparative HPLC
Recycling function for separation of natural compounds.

Complete Laboratory Range
High quality instruments & consumables.

Pure Chemicals for Research
Pure chemicals & reagents for research applications.

Supercritical Fluid Extractors
Entry level SFE system for extraction in supercritical media.
